DETAILED ACTION

And

Notice of Allowance

1. Claims 1-63 are allowed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

2.1 The prior art does not expressly teach or make obvious the claimed invention of Independent Claims 1, 18, 28, 33, 50 and 60. Specifically, the allowable subject matter disclosed in the independent claims where it is claimed that, "*a method comprising: creating a string that models a trace having cross capacitance*" directed towards the simulation of circuit traces on an integrated circuit, that is going to be fabricated, is a non-obvious improvement over the prior art. Further, the use of a string model for modeling *physical structures* in an integrated circuit is known in the art as disclosed by the *Nakamura reference U.S. Patent 6,192,330*, however, as argued by the Applicant, *see the response dated 8 June 2004, page 18*, that the *Nakamura reference* is directed towards, "...*invention of Nakamura is "recognizing and simulating two-dimensional shapes in evaluating semiconductor elements."* (emphasis added) (*Nakamura, col. 1, ln. 9-11*)", as opposed to Applicant's amended claim language which claims that the "*string model*" being used is for modeling, "*a [circuit] trace having cross capacitance*". The Examiner asserts that this new use of a string model in combination with the limitation of "*simulating the application of an applied noise voltage to at least one of said cross capacitors*" is a non-obvious modification over the prior art and is therefore allowable subject matter. Furthermore, Applicant's admittance, interpretation of the prior art asserted and arguments recited in the

responses to the Examiner's Office actions in combination with the instant amendments are considered persuasive so as to overcome the prior art. Dependent Claims 2-17, 19-27, 29-32, 34-49 51-59 and 61-63 are allowable as they depend from allowable base claims.

2.1 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 5,729,466 *Bamji* discloses a piecewise linear method of modeling circuit elements (**Figure 7**).

3.1 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwin M Craig whose telephone number is 703 305-7150. The examiner can normally be reached on 10:00 - 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Teska can be reached on 703 305-9704. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
